PROFESSIONAL SUMMARY:

Passionate student developer and Founder of Zentrix with experience in Web Development, Mobile Application Development, and IoT Solutions. Skilled in building innovative projects focused on accessibility, automation, safety, education, and smart monitoring systems. Dedicated to solving real-world problems through technology while continuously learning and expanding technical expertise.

TECHNICAL SKILLS:

Web Development

- HTML
- CSS
- JavaScript
- Responsive Web Design

App Development

- Mobile Application Design
- UI/UX Design
- API Integration

IoT Development

- Arduino
- ESP32
- Sensor Integration
- Automation Systems

Core Skills

- Problem Solving
 - Project Development
 - Frontend Development
 - System Design
-

PROJECTS:

- ScribeMate (Mobile App)
- Accessibility-focused application designed to assist visually impaired students during examinations.
- Language Translator (Mobile App)
- Real-time multilingual translation application for seamless communication across languages.
- Nutrition Tracker (Mobile App)
- Health-focused application for tracking nutrition intake and dietary habits.
- Student Learning Website (Web)
- Educational platform that enables students to learn, practice, and monitor their progress.
- Jewellery Website (Web)
- Modern business website designed to showcase and promote jewellery collections online.
- Economy Savings Manager (Web)
- Personal finance platform for tracking expenses and managing savings goals.
- Energy Monitor (IoT)
- Smart monitoring system that tracks electricity consumption and usage patterns.
- Automatic Railway Gate System (IoT)
- Automated railway crossing solution using train detection mechanisms.
- Accident Prevention at Zebra Crossing (IoT)
- Pedestrian safety system designed to reduce road-crossing accidents.
- Vehicle Parking System (IoT)
- Smart parking management solution with slot availability monitoring.
- Driver Sleeping Alarm (IoT)
- Drowsiness detection system that alerts drivers to improve road safety.
- Anti-Theft Alarm System (IoT)
- Security solution that detects unauthorized access and triggers alerts.

- Drainage Monitoring System (IoT)
 - Monitoring system for tracking drainage levels and preventing overflow.
 - Gas Leak Detection System (IoT)
 - Safety system that detects gas leakage and provides instant warnings.
 - Landslide Detector (IoT)
 - Environmental monitoring system for identifying potential landslide risks.
-

ACHIEVEMENTS:

- Founder of Zentrix
 - Developed 14+ Projects Across Web, App, and IoT Domains
 - Focused on Accessibility, Automation, Safety, and Smart Monitoring Solutions
-

EDUCATION:

Completed my 12th in Velammal Matric Higher Secondary School

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering (ECE)

R.M.D. Engineering College

Expected Graduation: [2031]

INTERESTS:

- Web Development
 - Mobile App Development
 - Internet of Things (IoT)
 - Entrepreneurship
 - Technology Innovation
-
